SYED MUHAMMAD HUZAIFA

syedmuhammadhuzaifa@2000@gmail.com — +92 332 1304560 — https://muhammadhuzaifa2000.github.io/

Summary

Industrial Electronics Engineer with practical experience in industrial automation and control systems. Experienced in PLC, SCADA, and DCS-based environments, including system configuration, testing, troubleshooting, and documentation. Brings a strong electronics background with the ability to translate control logic into reliable field execution.

Professional Experience

The Automators (Pvt) Ltd *Present*
Systems Engineer

- Visited sites to support automation-related activities and coordination.
- Assisted in preparation and review of technical documentation for control and automation systems.
- Supported HMI development and modifications for operational monitoring.
- Worked on Modbus communication setup and testing between field devices and control systems.

The Automators (Pvt) Ltd *Mar 2025 – Jul 2025*
Trainee Engineer

- Learned fundamentals of Distributed Control Systems (DCS) architecture and operation.
- Gained understanding of sugar plant processes and overall plant workflow.
- Assisted with basic control logic, field instrumentation, and operator interface practices.

Patex Boards (Pvt.) Ltd. *Apr 2024 – May 2024*
Automation Intern

- Assisted in troubleshooting and maintenance of electronic and automation systems for sheet manufacturing lines.
- Supported routine inspections and fault diagnosis of production machinery.
- Worked with engineers to improve machine reliability and production efficiency.

Saf International (Pvt) Ltd *Nov 2023 – Dec 2023*
Intern

- Gained exposure to industrial electrical and automation environments.
- Observed maintenance and operational activities related to terminal systems.
- Assisted engineering staff during routine technical tasks.

AutoCon (Control System Integration) *May 2023 – Jul 2023*
Trainee

- Received training on different PLC platforms and their industrial applications.
- Learned basics of industrial sensors and field instrumentation.
- Assisted in wiring, testing, and basic troubleshooting of control system components.

Education

Institute of Industrial Electronic Engineering (IIEE), NED University
Bachelor of Engineering (B.E.) in Industrial Electronic Engineering
Relevant Coursework: Instrumentation & Automation, PLC Systems, Hardware Design, Industrial Robotics

Govt College For Men Nazimabad, BIEK
Intermediate in Pre-Engineering (Physics, Chemistry, Mathematics)

Falcon House Grammar School, BSEK
Matriculation in Science (Physics, Chemistry, Biology, Mathematics)

Skills

- **PLC Programming:** ISPSoft, WPLSoft, STEP 7, TIA Portal
- **SCADA & HMI:** WinCC, Reliance SCADA, HMI Display Builder
- **DCS & Control Systems:** Honeywell Control Builder, Honeywell Station
- **Logic Controller:** Honeywell, Delta, Siemens, Arduino
- **Industrial Communication:** Modbus (RTU/TCP)

Expertise

- **Circuit & System Simulation:** Proteus, NI Multisim, NI Labview
- **System Modeling:** MATLAB, Simulink
- **Drafting & Design:** AutoCAD

Competencies

- **Technical Documentation:** MS Word, LaTex
- **Data Handling & Reporting:** MS Excel, Powerpoint
- **Diagrams & Flowcharts:** MS Visio
- **Programming:** Visual Studio Code

Key Projects

File Sharing Server (NAS) Implementation *2025*
The Automators (Pvt) Ltd — Technologies: TrueNAS

- Designed and deployed a centralized file sharing server using TrueNAS to support internal data storage and access.
- Configured user access, shared directories, and permissions for secure and structured file management.
- Assisted in integrating the NAS within the local network to enable reliable file access for engineering and office teams.

Real-Time Plywood Thickness Profiling System *2024*
Pakitex Boards Pvt Ltd — Technologies: SCADA, PLC, Laser Sensors

- Designed a laser triangulation system to monitor plywood thickness with ± 0.1 mm accuracy
- Integrated PLC with SCADA for real-time visualization and logging
- Reduced material waste by 12% through automated quality-control alerts

Professional Development

- **IEEE Member:** Organized 3 workshops on Industrial IoT at IIEE-NED (2022–Present)
