SYED MUHAMMAD HUZAIFA

Industrial Electronics Engineer

Automation / Control Systems / OT Networks

From control logic and operator interfaces to industrial communications and practical measurement systems.

SYSTEMS ENGINEER

The Automators (Pvt) Ltd

B.E. Industrial Electronics | NED University

DCS & PLC
Control engineering

HMI & SCADA
Operator visibility

OT NETWORKS
System connectivity

Connecting plant requirements to working systems

I am an Industrial Electronics Engineer with practical experience in PLC, SCADA and DCS environments. My work spans system architecture, control logic, HMI configuration, industrial communications, testing and technical documentation.

EDUCATION

NED University of Engineering & Technology

Bachelor of Engineering in Industrial Electronics
Instrumentation, automation, PLC systems and digital electronics.

LANGUAGES

Urdu: fluent / English: proficient
Chinese: conversational (HSK II)

EXPERIENCE

AUG 2025 - PRESENT
The Automators
Systems Engineer

2025
The Automators
Trainee Engineer

AUG 2024 - MAR 2025
Technology & Solution (TechSol)
System Engineer

APR - MAY 2024
Pakitex Boards
Automation Intern

NOV - DEC 2023
SAF International
Intern

MAY - JUL 2023
AutoCon
Trainee

SELECTED PROJECT 01 / PAKITEX BOARDS / 2024

Real-time plywood thickness profiling

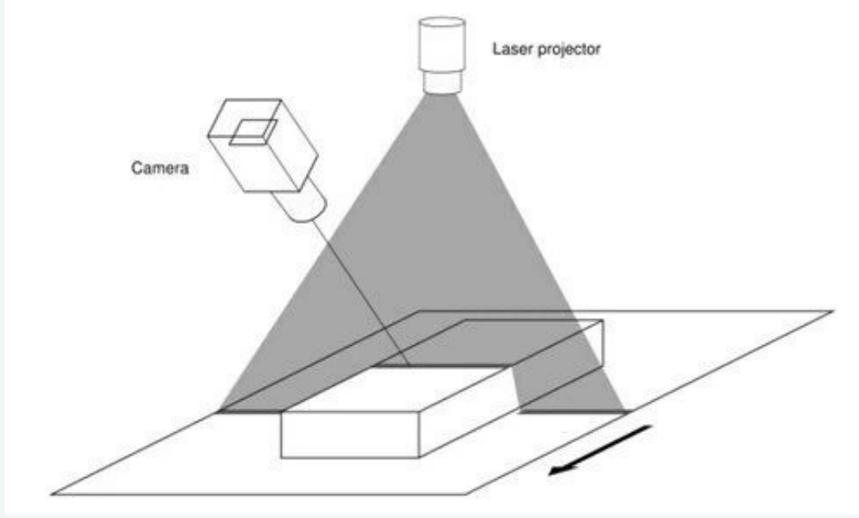

Laser measurement, PLC integration and SCADA visualization

PURPOSE

Monitor plywood thickness during production and make deviations visible to operators.

MY CONTRIBUTION

- Designed a laser triangulation-based thickness monitoring system.
- Integrated PLC and SCADA for live visualization, monitoring and data logging.
- Enabled automated thickness alerts to reduce dependence on manual inspection.

Measurement principle illustration from my website.

±0.1 mm

Approximate measurement accuracy
Laser sensors / PLC / SCADA

Control system design & implementation

Honeywell Experion PKS / C300 controller / Control logic / HMI

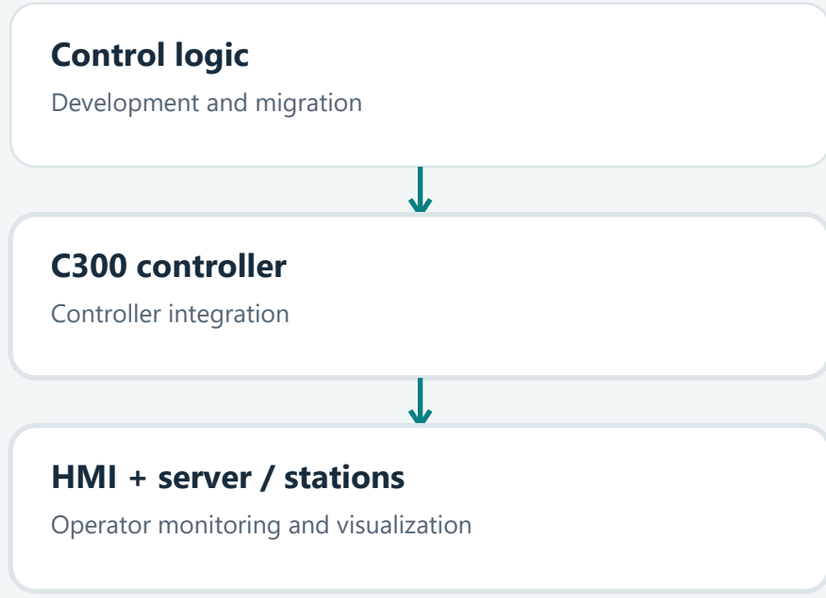

PROJECT SCOPE

Develop control logic and operator interfaces, integrate the controller and support logic migration within a Honeywell Experion PKS environment.

MY CONTRIBUTION

- Built control logic for the project process requirements.
- Integrated the Honeywell C300 controller.
- Developed HMI displays and server/operator station configurations.
- Worked on migration of control logic.

FUNCTIONAL OVERVIEW

Conceptual summary of project scope; not an as-built architecture.

System readiness, connectivity & availability

Maintenance support and industrial networking across plant environments

UNICOL Distillery

MIRPURKHAS / 2025

Control system maintenance

- Performed Honeywell Experion maintenance and readiness checks.
- Verified system health, communications and operator station functionality.
- Supported troubleshooting for reliable operation.

Korangi Power Complex

K-ELECTRIC / 2026

Experion PKS maintenance

- Supported system maintenance and readiness checks.
- Checked station health, communication status and overall availability.
- Assisted with troubleshooting and verification.

Pak Ethanol

2025

Network configuration & redundancy

- Configured industrial switches for control system communications.
- Set up redundancy hardware to support availability.
- Verified network connectivity, redundancy status and communication paths.

A practical stack from field devices to software

CONTROL & AUTOMATION

Honeywell Experion PKS / LX, C300
Siemens and Delta PLCs
TIA Portal, STEP 7, ISPSoft, WPLSoft

VISUALIZATION & COMMUNICATION

WinCC, Reliance SCADA, HMI Display Builder
Modbus RTU / TCP
Industrial network switches

MODELING & DOCUMENTATION

MATLAB / Simulink, NI LabVIEW
NI Multisim, Proteus, AutoCAD
MS Visio, technical documentation

ADDITIONAL PROJECT / THE AUTOMATORS / 2025

Centralized file sharing with TrueNAS

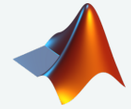

Designed and deployed a NAS for engineering and office file access. Configured users, shared directories and permissions, and integrated the server into the local network.

ELECTRONICS & COMPUTING PROJECTS

Selected projects featured on my website

Gas detector

Digital filter design

RC robot

CONTINUING DEVELOPMENT / CONTACT

Let's build dependable industrial systems.

SELECTED COURSE COMPLETIONS

01 **Industrial Automation Training**

AutoCon / 2023 / 32 hours

02 **Cyber Security 101 Learning Path**

TryHackMe / 2026

03 **VMware vSphere ESXi & vCenter Administration**

Kamyaab Freelancer Program / 2026

04 **Computer Communication Network Administrator**

Kamyaab Freelancer Program / 2026

Selected training certificates are available on my website.
